

PIRANHA GAMES AND XSOLLA INTEGRATION: 2 ENGINEERS, 8 HOURS

Xsolla reviews our partnership
with Piranha Games'
MechWarrior Online, which only
took 8 hours to fully integrate
the full technical solution

MECHWARRIOR ONLINE

As a free-to-play vehicular combat video game available on PC, MechWarrior Online boasts stunning aesthetics, design, and gameplay for an immersive Mech experience as the pilot. As a tactical “MechWarrior” piloting a BattleMech, you are able to engage in 12 versus 12 battles in 3 different modes (Assault, Conquest, Skirmish) ultimately gaining experience and in-game currency. All MechWarriors are fully customizable with unique weapons and equipment that fit the playing style of the commander.

THE SITUATION

Piranha Games saw that they needed to implement an inclusive, reliable solution to accept payments globally for their hit game, MechWarrior Online. Their vast user network demanded immediate attention, and in order to cater to their needs, Piranha Games decided to move forward with Xsolla's services spanning the entire globe with over 600 payment methods.

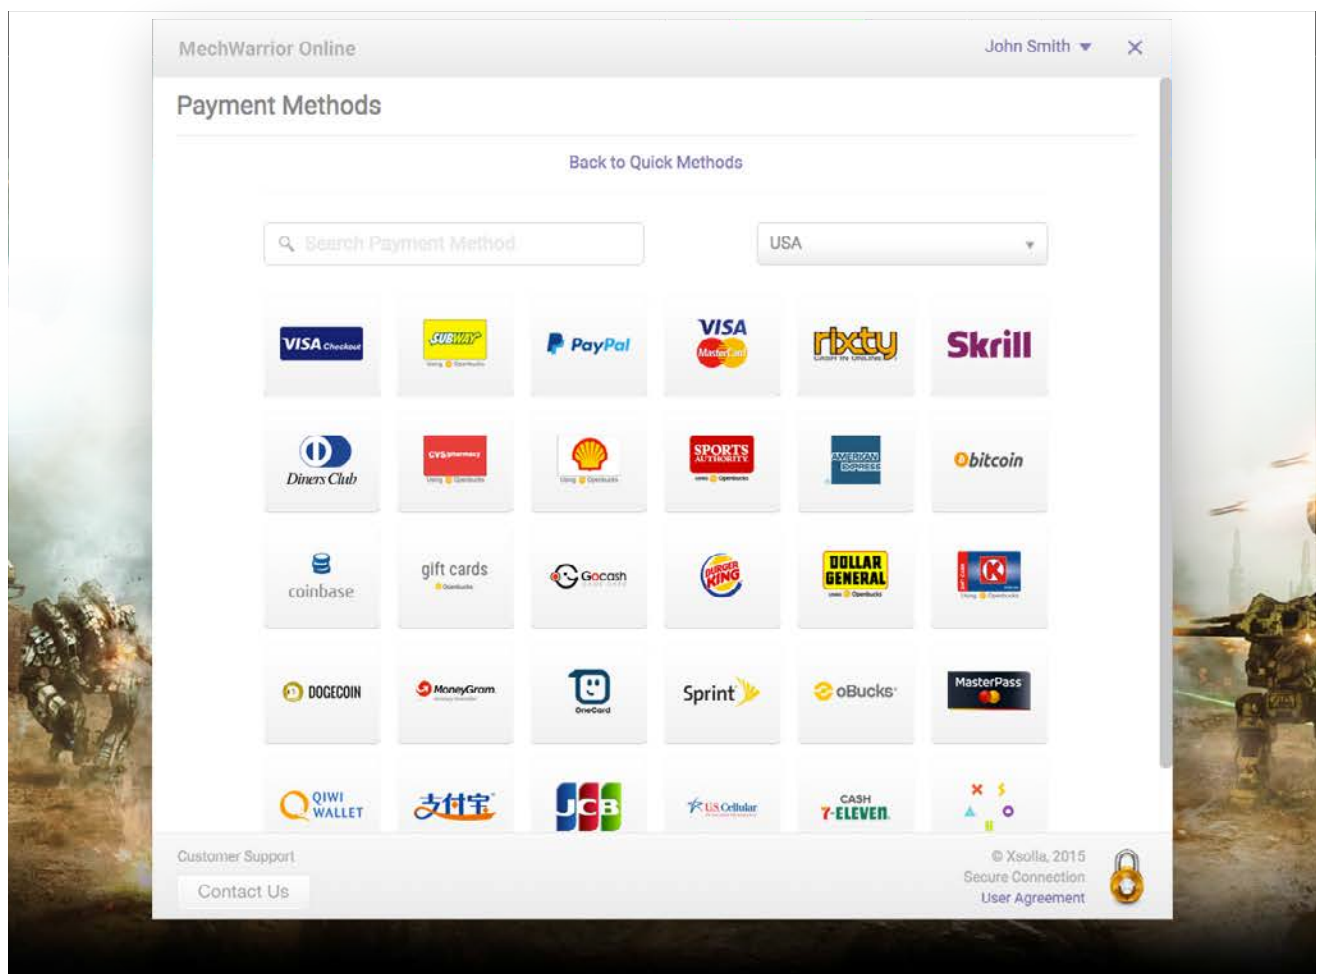

With prior payment services scheduled to be switched off soon, Piranha Games acted proactively and found Xsolla's solution fit their needs perfectly.

THE SOLUTION

"We are happy to announce that as of April 1st at 12:00 PM PDT, we will be transitioning our global payment services provider from Playspan to Xsolla."

— Alexander Garden

The sooner the implementation happened, the better, and all it took was one engineer from Piranha Games and one integration manager from Xsolla to finish the implementation in just 8 hours (including testing).

MechWarrior Pilots all over the world can now take advantage of the local payment options available through Xsolla to purchase their favorite Mechs, equipment, and weapons to customize their gameplay.

Join the BattleTech Universe and fight to see if you and your Mech stand a chance in this high-action premium free-to-play title that has everyone on the edge of their seats!
